PROJECTS

She-Save Herself Everywhere

Our idea is to design a system which will make every place and every hour safer for women. The system shall geo tag and send SOS alert to the nearest police station, close contacts , alert people in and around the venue of the crime and also sprays some pungent smell giving chemical simultaneously, everything just at a click of a button.

Online College Canteen Automation System

The main objective of online food ordering system is to automate the existing manual system with the help of advance computerized software so, that valuable data can be stored for longer period with easy accessing and manipulation of the same.The registered user can access the account with valid credentials. User can surf the food items according to categories, Cart and online payment options are available to user. User can track their orders with the food details.

DECLARATION

I hearby declare that the above furnished details are true to the best of my knowledge.

HARSHEETHA J

SKILLS

Once I'm clear on what the task or project is, I'm good at determining the best way to accomplish it.

I believe there is value in collaboration.Working in a team with a collaborative spirit is important when the need arises.

I like to evaluate current procedures and processes when possible to identify any foreseeable issues or concerns.
