

## Messages Box Setup in User Area

1. The user can go to Messages to any patient note or internal message from another provider.

The screenshot shows a medical software interface. At the top, it displays 'Logged in: Administrator (Default)', 'Active Patient: James Smith (1111) DOB: 1955-12-10 Age: 54', and the date 'December 14, 2009'. A left-hand navigation menu includes options like 'Default', 'Top', 'Bot', 'Calendar', 'Messages', 'Patient/Client', 'Management', 'Visits', 'Fees', 'Administration', 'Reports', and 'Miscellaneous'. The main content area is titled 'Demographics (More) (Delete)' and contains fields for 'Who' (Name, External ID, DOB, Sex, S.S., Marital Status, User Defined) and 'Contact' (Address, City, State, Postal Code, Country, Emergency Contact, Home Phone). Below this, there are sections for 'Medical Problems (More)', 'Immunizations (More)', 'Prescriptions', and 'Notes (More)'. A status bar at the bottom shows 'Active Patient: James Smith (1111)', 'Active Encounter: None', and a 'Popups' dropdown menu.

2. The user can open up any message to read, edit, and route to another user.

Action	From	Type	Status
Open	Dr. Bill Johnson	New Document	Done
Open	System	Lab Orders	New

Add New Delete

3. Order Authorization will be a link sent from one provider to another provider for approval. For example, a nurse can order a refill and route it to a doctor for him/her to Sign the order.

4. Lab results signoff will be based on results received from Quest/Labcorp through their respective interface. When the results are reviewed and signed of by the authorizing provider, they will be documented in the patient record.
