

## OpenEMR Cloud Standard Edition Now Available in AWS Marketplace

*First HIPAA-eligible, ONC-certified, low-cost EHR in the Public Cloud*

**RUTLAND, Vt. - May 8, 2018** - *PRLog* -- [OpenEMR](#), the most popular open-source electronic health record (EHR) and medical practice management solution, has launched [OpenEMR Cloud Standard Edition](#) in AWS Marketplace.

"[OpenEMR Cloud Standard](#) is the first EHR in the Amazon Marketplace directly aimed at domestic US providers," said Asher Densmore-Lynn, an OpenEMR architect. "We've leaned on Amazon's orchestration services and our own state-of-the-art deployment practices to provide robust, direct answers to HIPAA's challenges."

[OpenEMR Cloud Standard](#) is the HIPAA-eligible, Marketplace edition of the [OpenEMR Cloud product line](#). AWS Marketplace is an online store that helps physicians discover and immediately start using the software and services they need to run their practices. AWS serves as a HIPAA Business Associate for HIPAA-covered entities deploying OpenEMR Standard Edition.

With no software licensing fees, OpenEMR is the high-value solution in the HIPAA-eligible electronic health records and practice management software category. Now, with Standard edition, OpenEMR is easy to provision and practices can get up and running in just a few clicks. OpenEMR Cloud Standard edition is also inexpensive to operate, starting at around \$70 per month with no-per provider charges.

"I believe that [OpenEMR Cloud Standard Edition](#) is a great asset to the OpenEMR community because it enables users to deploy an easy-to-configure, HIPAA-eligible, cloud-based platform," said Sherwin Gaddis, President of Virginia-based [JSE](#), a certified professional support provider of OpenEMR solutions for ambulatory healthcare providers.

"OpenEMR Cloud Standard is cost-effective and a strong contender in a consolidating EMR market. For these reasons, JSE plans to recommend OpenEMR Standard to all its clients," Sherwin added.

### About OpenEMR

[OpenEMR](#) is an electronic health record (EHR) system that was originally developed in 2002 by physicians to help them run their practices. As an open-source project, it is maintained and supported by a vibrant community of volunteers and professionals that includes several hundred contributors and is supported by more than 40 companies. OpenEMR is [ONC Certified as a Complete EHR](#), and it is recognized as the most popular open-source electronic health records and medical practice management solution in the world. OpenEMR is downloaded more than 4,000 times per month, and it is estimated that it is used by more than 100,000 medical providers serving more than 200 million patients. OpenEMR has been translated into 34 languages and is used by facilities in more than 100 countries across the globe. Open-source software has changed the world for the better, and OpenEMR is a leader in open-source healthcare software. Costly proprietary EMRs are no longer the only option.
